KEISER®

Keiser, the innovative leader in indoor group cycling, raises the bar again.

M3i

KEISER INTRODUCES INTELLIGENT CYCLING AND THE MOST TECHNOLOGICALLY ADVANCED INDOOR GROUP CYCLE IN THE INDUSTRY!

The company that revolutionized indoor group cycling with magnetic resistance, the first bike with a computer, and who made power an industry training standard, now introduces the most technologically advanced indoor group cycle ever, the Keiser M3i featuring Bluetooth wireless display. The new Keiser Bluetooth wireless computer is

certain to become popular with both riders and group exercise instructors. The computer can transmit to a receiver for projection onto a screen and can also partner up with a wireless phone or tablet. At first glance the Keiser M3i catches the eye with a sexy new black color scheme that also features a red flywheel guard.
